

# HCD SERIES from HAPPY

## Single-Head Table-Top Embroidery Machine

Engineered with HAPPY's legendary dedication to quality and durability, the HCD-1501 makes pro-quality production embroidery easier to achieve than ever.

### Sewing Power.

HCD possesses the key requirements of a serious production single-head: a generous max sewing field (17.25" x 16.5"), quick-change cap system with a max field of 14" x 3", and 1200spm max speed. Owners can count on HCD to deliver years of quality production: it's built to run hard, and backed by a 5-year limited warranty.

### Operator-Friendly.

HCD's color control panel has proven itself so easy to learn and operate that HAPPY has made it the standard for all of its multi-needle machines. With built-in help, onboard maintenance aids and auto-error correction, you'll become productive sooner, and stay productive longer.

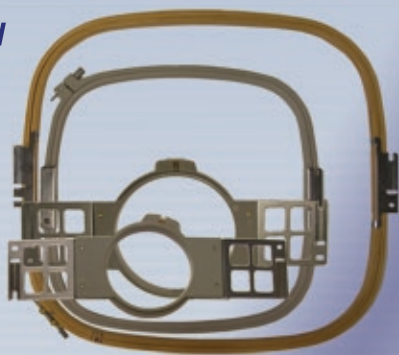

### Better-Connected.

There are lots of convenient ways to connect HCD to your particular taste: Transfer designs by CF card or USB flash drive. Or, connect directly to a PC by USB, serial, or through a LAN port. There's even an optional floppy drive. Networking allows design setup & transfer, and production management for networked machines.

### commercial hoop set

Each HCD comes standard with a commercial hoop set, including 2 ea. of the large 17.25" x 16.5" square.

### direct PC ports

serial, USB & LAN ports included

CF card compatible

"Jump" drive slot

### wide cap system

Included! Quick-change, tool-less system with a wide 14.1" x 3" max sewing area

### Network-Ready: Your Advantage

Built-in network capability allows you to link compatible HAPPY machines together, including HCD and HCR multi-heads. HAPPYLAN networking software included!
