HIGH SPEED EMBROIDERY MACHINES

HAPPY embroidery machines have earned their reputation for reliability and high production. You'll love their versatility and what they can do for your embroidery business!

Only from HAPPY...

It's the ENGINEERING that has always been the key to our success! Take a look at some of the precision parts we put into our machine!

Main Drive Shaft

Our machines are built with the **strongest main shaft** in the industry! This helps you power through heavy jobs with confidence and provide superior stitch quality to your clients!

Needle Bar Drivers

Only HAPPY machines come with **solid steel needle bar drivers** (reciprocator/jump structure) - the heart of the machine's moving parts.

Needle Bars

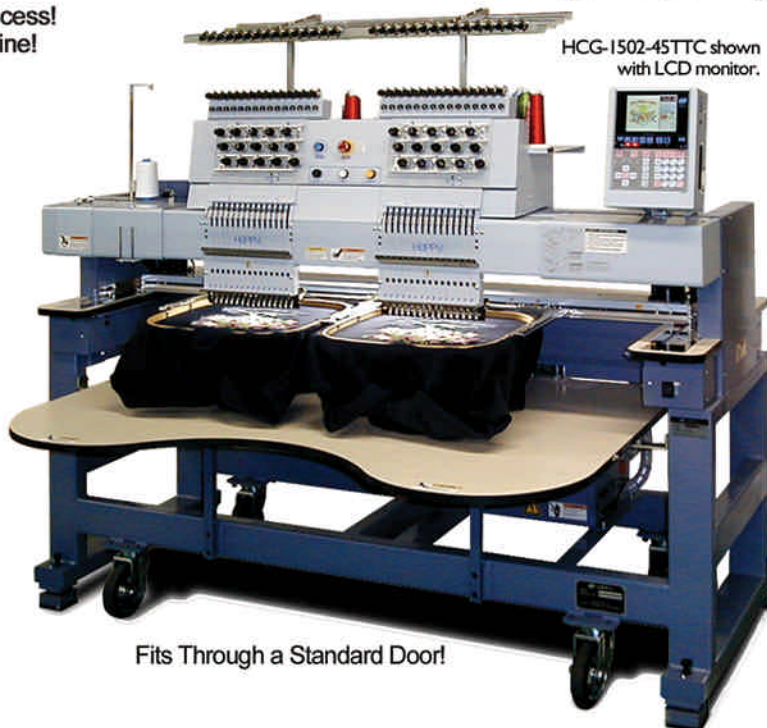

Only HAPPY machines come with 1/4" thick, **solid steel needle bars**! This lets the machine stand up to any job, garment or even the occasional operator error, and keep right on sewing!

Heavy Duty Drive Belts

Only HAPPY machines come with the strongest drive belts in the industry! These belts provide a secure grip for greater stitch accuracy and gives the longevity that lets you count on your HAPPY machine, year after year.

THE EMBROIDERY MACHINE for High Production, High Reliability, High Quality.

HCG-1502-45TTC shown with LCD monitor.

Fits Through a Standard Door!
