

Voyager Package Specials: *Production Deluxe*

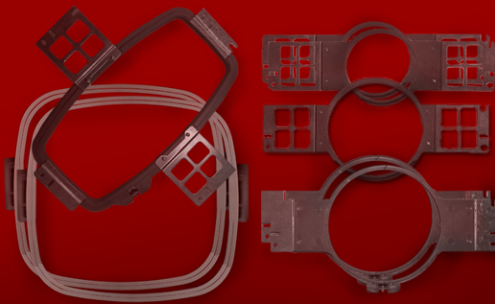

For those ready to produce quality work in serious volume, our Production Deluxe package offers the greatest capability as well as the biggest value. Each aspect of the package provides the owner with real-world capability of professional production shops: a hoop kit that maximizes sewing time; full startup kit, HAPPY's renowned cap sewing system and a sturdy stand - all to help you accomplish more with Voyager!

Custom Stand

Professional Hoop Kit

Outfits embroiderers with 2 examples of each key hoop size, helping you maximize output with minimal fuss.

Full Starter Kit

Includes enough of everything for volume production: a variety of colors, lots of stabilizer, bobbins and more.

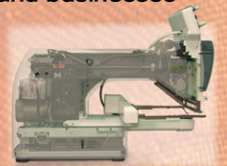

Finished Cap Sewing System

Provides amazing stitch quality on finished caps, allows a generous 67mm x 290mm sewing field.

The Voyager Advantage

As a multi-needle machine, HAPPY's Voyager provides a unique formula of strengths for sewers and businesses entering the world of production embroidery: it has the durability of its larger cousins, with strong components that withstand years of hard work. Its large 12"x12" sewing field

accommodates just about any type of job, big and small. The other side of Voyager's winning formula is its friendliness for startups and small businesses: it's compact and quiet enough to operate in the home or small office - even while delivering its full production potential. At 88 lbs and needing only 11"x17" of level space to sit, this offers owners a great deal of flexibility.

We invite you to join the many who have found success with HAPPY's most popular machine ever!
